## Professional Summary

I am a Full Stack Developer with 5 years of experience, starting my career as a React Native Developer, where I built mobile applications for Android, iOS, and Huawei platforms. I later transitioned to web development, working with React, Next.js, and Node.js. My experience also includes working with databases such as PostgreSQL and MongoDB. In addition, I have hands-on experience with cloud technologies like AWS and Microsoft Azure, as well as CI/CD pipelines using GitHub Actions. Successfully developed and deployed multiple applications, achieving significant user engagement and revenue.

## Work Experience

### Full Stack Developer

*Droidor | March 1, 2021 – Present*

- Developed an interconnected e-commerce mobile application suite using React Native, consisting of a user app for food and service ordering, a rider app, and a merchant app for stores. Achieved 15,000 to 20,000 orders per day, integrating features for wallet payments and bill management.
- Transitioned to web development, building a B2B comparison tool for software integration in the hospitality and travel industries. Successfully onboarded customers under a subscription model.
- Developed a problem-solving tool for hospitals that utilizes OCR and LLM technologies to process patient referrals. The tool integrates NextGen APIs to push patient data and uses RingCentral to fetch hospital faxes. It is now in the MVP phase with two hospitals onboard, including one paying client.
- Developed a B2C app that helps patients book appointments on their behalf. The app uses chat or voice chat to gather the required patient information, connects with the clinic, and maps their IVR system before making the call. It then calls the hospital to secure and confirm the appointment for the patient.

### React Native Developer

*Webwek | December 1, 2020 – February 28, 2021*

- Developed a service provider app using React Native, enabling service providers to list their services and allowing customers to search for and access those services.

### React Native Developer

*VeteranLogix | September 1, 2019 – November 30, 2020*

- Developed multiple mobile applications for Android and iOS platforms using React Native.
- Worked on a social app, allowing users to post pictures, create profiles, like, comment, and share content. Handled the front-end and integrated REST APIs.
- Contributed to a service-based app where customers could find nearby service providers using Google Maps. Enabled service providers to list their services.
- Deployed the Android app to the Google Play Store.

## Education

- Bachelor of Science in Computer Science

ARID Agriculture University, Rawalpindi | 2015 – 2019

## Skills

- JavaScript, HTML, CSS, Tailwindcss, shadcn
- React, Next.js, remix.js, Node.js
- React Native, Firebase, Onesignal, Stripe, Spay
- MongoDB, PostgreSQL, SQL
- Git, Docker
- AWS, Microsoft Azure
- Large Language Models (LLMs), Prompt Engineering
- Cursor, Co-pilot, Antigravity.
- Advanced API Integration (e.g., NextGen EHR, RingCentral APIs, OpenAI realtime API) with expertise in adapting to complex documentation and use cases.
- Communication, Teamwork, Problem-Solving, Time Management
